DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1-13, 15-21, and 27-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Restarick et al. (US 6554,064).

Restarick et al. includes all the limitations of claims 1, 9, 18, 20, and 27 including: an intelligent device in a screen (figure 9b), gathering data and flowing slurry (claim 30), and running the line and screen into the well and collecting data (claim 24; figure 9b).

With respect to the dependant claims Restarick et al. also teaches: claimed sensor types (abstract)-claims 2-8, 10-13, 19, and 21; control line to surface (figure 9b; claim 6)-claims 15-17; and performing gravel packing/sand control (abstract)-claims 28 and 29.

NOTE: The intelligent completion device disposed in the sand screen was not disclosed in provisional application 60/147,861 (filed 8/9/99); it first appeared in the parent

application 09/631,859 (filed 8/2/00). Thus this limitation only has priority back to August 2, 2000.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 14 and 24-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Restarick et al. (US 6,554,064) in view of Ross (US 5,964,296).

As discussed above, Restarick et al. includes all the limitations of claims 14 and 24-26 with the exception of disclosing the fiber optic line. Ross teaches that fiber optic lines are well known in the well arts to be interchangeable with a variety of other sensor control devices (column 6, line 63-column 7, line 14). Thus at the time of the invention it would have been obvious for one having ordinary skill in the art to switch the control means of Restarick et al. with a fiber optic line, because doing so is well known in the art (per Ross).

Response to Arguments

5. Applicant's arguments with respect to claims 1-21, 25, and 26 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer Dougherty whose telephone number is (703) 308-6365. The examiner can normally be reached on Monday-Thursday from 7:30 AM to 5:00 PM (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bagnell, can be reached on (703) 308-2151. The fax phone number for the organization where this application or proceeding is assigned is (703) 305-3597.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1113.
